National Transportation Week: Second Week in May

Lisa T. Abbott and John P. Abbott

ABSTRACT

The topic of transportation incorporates a vast amount of divergent information. The subject matter varies greatly, and includes titles ranging from Camels of the Outback to The Great American Motion Sickness; or Why You Can't Get There from Here. To establish boundaries for this resource guide, the present authors referred to Public Law 87–449, 14 May 1962, which authorized the president to proclaim an annual National Transportation Week. Using this as a basis, they defined transportation as the movement of people or goods from one place to another, and included a little tourism to break up the concrete and steel. While some historical materials are included, this resource guide emphasizes modes of transportation currently used in the United States.

INTRODUCTION

The topic of transportation incorporates a vast amount of divergent information. The subject matter varies greatly, and includes titles ranging from *Camels of the Outback* to *The Great American Motion Sickness*; or *Why You Can't Get There from Here*. To establish boundaries for this resource guide, the present authors referred to Public Law 87-449, 14 May 1962, which authorized the president to proclaim an annual National Transportation Week. Using this as a basis, they defined transportation as the movement of people or goods from one place to another, and included a little tourism to break up the concrete and steel. While some historical materials are included, this resource guide emphasizes modes of transportation currently used in the United States.

The arrangement of the guide is by type of resource, rather than by mode of transportation. Materials are listed alphabetically within each section. The guide includes most types of materials, with the exception of journal articles and audio-visual media. It is not meant to be complete, but is designed to identify a cross-section materials that are likely to be available in medium-sized public and academic libraries. This resource guide includes the following sections: General; Abstract Journals, Bibliographies, Databases and Indexes; Career; Dictionaries, Directories, Encyclopedias, Guides, and Handbooks; Juvenile/Young Adult; Legal; Maps; Statistics; and Travel.

Massow, Rosalind. Travel Easy: The Practical Guide for People Over 50. Washington, DC: Scott Foresman, 1985. \$8.95. 272p. ISBN 0-673-24817-8 pa.

Massow discusses issues of interest to the mature traveler, including the question of whether to travel alone or with others, air versus surface travel, medical concerns, and whether to travel in the United States or abroad. The book includes three appendixes: 1) state and national tourist offices, 2) reading list, and 3) maps of key tourist sites.

NOTE

Country-by-country travel book series, such as Fielding's Travel Books, Fodor's Modern Guides and Ford's Travel Guides, contain useful tourist information on most countries in North, South and Central America, Europe, Asia, Africa, and Australia, and the Pacific. The titles are too numerous to list, but all contain advice and recommendations about travel, accommodations, food, shopping, and local customs.
